ABOUT US

Greens Electric is a complete, one-stop electrical provider for new builds and major remodels — from main switchboards and distribution panelboards to lighting fixtures, wiring devices, HVAC, and appliances, all under one roof. With 30 years of expertise in value engineering, we review your electrical plans, assist with design, and consult directly with your MEP engineer and utility company to build a cost-effective solution. We also provide material take-offs for electrical rough-in, light fixtures, HVAC, bathroom accessories, LED mirrors, shower doors, and more — helping you budget with confidence from day one.

Greens Electric is the only equipment distributor that also owns and builds its own hotels. As part of the Greens Group, we own 25+ hotels across brands including Marriott, Hilton, IHG, and others — and we supply our own new-build properties. That gives us a rare three-sided view of the hospitality industry: As owner, builder and distributor. We know how to value engineer without compromising quality, sourcing product at competitive pricing while meeting rigorous quality standards and every applicable city, state, and brand requirement.

Greens Distribution focuses on the hospitality and multi-family markets. We own our own factory in Ahmedabad, India, manufacturing shower doors, LED mirrors, and bathroom accessories with in-house design and quality control teams — ensuring every product meets our standards before it ships. The result is quality product at a highly competitive price point. In recent years we've supplied all of our own hotels projects, in addition to major hospitality projects across India and Dubai.

We understand hotels — because we build, own and manage them ourselves. Whether you're planning a new build or a major remodel, we'll be your most cost-effective, comprehensive, and reliable electrical partner from first plan review to final walkthrough.
